Job ID

REQ-10009609

Sep 03, 2024

Brazil

About the Role

Major accountabilities:

- Develop system designs that adhere to high level conceptual design and are traceable to functional as well as non-functional requirements in projects/enhancements.
- Ensure designs produced adhere to architectural roadmap and support the development, execution and operations of solutions.
- Deliver design solutions in line with system design standards (Core/Template).
- Ensure that solutions meet requirements outlined in the architecture handbook.
- Perform scoping, fit-gap workshops for projects/enhancements, proposes solutions for key gaps, provide effort estimations and align with business teams.
- Ensure that project/enhancements work is delivered to agreed time, cost and quality constraints following the release calendars.
- Ensure that developed solutions are peer reviewed, formally documented and signed off by business.
- Initiate solution testing to ensure these meet quality standards.
- Follow standardized design and development processes to enable cost effective delivery.
- Take accountability to ensure adherence with Security and Compliance policies and procedures within Solution Design scope.

Key performance indicators:

- Solution Quality; Cost efficiency; Delivery time; Customer Satisfaction; Achievement of KPIs for enhancements

Minimum Requirements:

Work Experience:

- Education
- University degree or adequate equivalent
- Bachelor degree in business management / engineering and SAP knowledge in specified module(s)/process areas
- Experience:
- At least 10+ years experience in SAP implementation in an international environment
- Proven experience in SAP implementations, detailed process analysis and design, system architecture, technology standards.
- Brazilian localization expertise is a must.

- Proven experience in understanding of SAP SD/MM/LE/WM/TM functionalities, related business processes.
- Knowledge of Pharma business: GxP regulations, Computer System Validation (CSV) methods.

Skills:

- Proven experience in SAP implementations in either of the areas of
 - Supply Chain Management (MM/SD): intercompany sales orders / purchase orders, inbound and outbound deliveries, master data
 - IM/WM (Inventory- and Warehouse Management)
