

RA System and Strategy Specialist

Job ID
REQ-10030142
Nov 25, 2024
United Kingdom

About the Role

This role offers hybrid working, requiring 3 days per week/12 days per month in our White City, London office.

Major Accountabilities:

- Provide first line systems and end user support e.g. incident management and service request management (including assessing, resolving or escalating technical issues).
- Facilitate communication and collaboration between RA Ops and NBS IT in matters pertaining to, RA owned applications, such as monitoring problems and summarizing activities for reporting to management.
- Coordinate with 2nd level support to address escalated System issues.
- Prepare user manuals, working instructions and training materials as appropriate, ensure training are recorded and records maintained in the relevant Novartis quality system.
- Participate in RA project initiatives involving, but not limited to, requirements gathering and analysis, migration, and deployment activities.
- Participate in validation and implementation activities for system upgrades and functionality enhancements as appropriate.
- Liaise with internal stakeholders to map business models, existing systems and establishes scope, business priority for change initiatives of small and medium size and complexity.

Essential Requirements:

- BS or MS degree in Computer Sciences or Life Sciences or a relevant discipline.
- Fluent in English (Strong oral and written skills required).
- Systems related experience in Pharma (preferably in a Regulatory environment) or related industry.
- Working knowledge with RA relevant computer programs and systems with demonstrated ability to learn and train others on new systems quickly.
- Basic knowledge of the worldwide Health Authority submission formats as well as the overall drug development process and related document requirements is desirable.
- Knowledge and experience with eCTD, IDMP, Publishing Standards and applicable related tools is desirable.
- Knowledge of ticketing tools, validation tools and concepts of GxP Software Development and testing is desirable.
