

Solution Delivery Architect Global Clinical Operations

Job ID
REQ-10018832
Nov 25, 2024
Spain

About the Role

Major accountabilities:

- Responsible for detailed design, development and delivery of system solutions for a specific business or technology area in alignment defined solution architecture and create the detailed process designs necessary to operate the software/service on a day to day basis
- Take accountability for technical delivery of projects/use cases for a specific business area
- Ensure that detailed designs adhere to solution architecture design (i.e. high level conceptual design)
- Ensure designs produced adhere to architectural roadmap, support the development, execution and operations of software/service and are traceable to functional as well as non-functional requirements in functional specification
- Provide comprehensive and authoritative technical guidance and ownership on a wide range of aspects within the area of project execution to influence internal and/or external stakeholders
- Ensure the overall user experience is considered when designing new solutions and services
- Take accountability to ensure adherence with Security and Compliance policies and procedures within Service Delivery scope.
- Individual contributor with responsibility for high to medium sized complexity of projects

Commitment to Diversity & Inclusion: :

We are committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.

Minimum Requirements:

- Bachelor's degree in Computer Science, Computer Engineering or related technical discipline or equivalent experience demonstrated
- 12+ years of experience with expert understanding and proven track record in analyzing business

processes, architecting, designing, developing and integrating complex, cross-divisional end to end technical solutions with large data volumes.

- Should have a background in programming and solution design. Exposure to a wide wide range of technologies is preferred.
- Experience in integrating or implementing Commercial off-the-shelf products
- Excellent verbal and written communication skills with ability to interact with senior IT and business stakeholders
- Ability to effectively convey complex technical concepts to a non-technical audience.
- Self-starter with ability to work autonomously in a highly matrixed and multi-cultural environment, taking full ownership of deliverables.
- Experience in highly regulated environments, ideally in the Pharma industry, including on Computer System Validation
- Experience working in Agile Scrum teams
- English Fluent
